Data Model ER Diagram

By: Carol Bado

Artist

PK	artist_id	varchar
	artist_name	varchar
	genre	varchar
	country	varchar

Tracks

PK	track_id	int
	track_name	varchar
	track_number	int
FK	artist_name	varchar

Albums

| PK	album_id	int
	album_name	varchar
	release_yr	varchar
FK	genre	varchar
FK	artist_name	varchar

(1)We will only be adding one artist (as the main artist) per album, though tracks may have multiple artists.

(2)Clients should be able to search for all albums by artist, all tracks by an artist, & all albums by artist genre.

(3)Clients should be easily able to search for any multi-artists tracks within an album.

(4)Clients will want to sort albums by release year (either ascending or descending)
